Sunnyvale, CA | 408-685-1496 | apn2443@gmail.com | [Portfolio](#) | [LinkedIn](#)

Education

San Francisco State University 2021 - 2025
San Francisco, CA

Bachelor of Science
Computer Science

Relevant Coursework

Operating Systems, Software Engineering, Data Structures & Algorithms, Database Systems, Mobile App Development, Analysis of Algorithms, Computer Networks, System Programming, Discrete Mathematics

Technical Skills:

Languages: C++, Java, C, Typescript, JavaScript, Python, SQL

Framework/Tools: React Native, Node.js, Express, Spring Boot, Expo, EAS

Backend: Supabase (PostgreSQL), Firebase, REST APIs, PostGIS

Systems/DevOps: Linux/Unix, Git, Docker, Github, Local Storage API

Professional Experience

Oxygen Entertainment | Software Engineer Intern | Jan 2025 - Oct 2025

Projects

DogGoSocial | [Github Link](#) | React Native, Supabase, TypeScript Jan 2026

- Developed a real-time mobile application for dog park tracking using Expo and Supabase.
- Engineered a custom Spiral Math Algorithm to resolve marker overlapping on maps, improving UI clarity.
- Implemented automated data expiry logic via PostgreSQL RPC functions to maintain real-time data accuracy.
- Integrated EAS (Expo Application Services) for cloud-based deployment and OTA updates.

Dog Matchmaker | [Github Link](#) | Node.js, Express, PostgreSQL Oct 2025

- Built a full-stack web app connecting users with canine breeds based on lifestyle parameters.
- Architected a relational database to handle complex trait filtering and high-frequency search queries.
- Deployed the environment on Render, managing environment variables and secure API routing.

Money Mutt | [Github Link](#) | JavaScript, HTML5, CSS3 Jan 2025

- Designed a privacy-first finance tracker utilizing LocalStorage API for client-side data persistence.
- Optimized frontend performance by managing application state without external library overhead.

Extracurricular

- SF Hacks Participant: Developed a prototype for a community resource-sharing app in 24 hours.
- SFSU CS Club: Active member; participated in weekly coding challenges and peer-led technical workshops.
- Intramural Volleyball: Team Lead; coordinated schedules and fostered communication in a competitive environment.
